Review Project Description

Each member of the team should review our project description. This affirms that each team member is committed to the project as describes and helps identify any errors in the project description that we are going to submit to the customer.

The project description is located at
https://docs.google.com/a/uah.edu/document/d/1iaKhtkDuFophUaRAL8fD1rYpyanblBSeQQirnwWs6Wg/edit?usp=sharing

Attached is a word document version of the project description if preferred. Be sure to use revisioning and attach your comments if you want to provide feedback that way instead of through Google Doc comments.

Once feedback is collected a second version will be created for review.

Priority: **Normal**

I know that we haven't completely finished talking about our configuration management, but I figure this will be a work product that we will need to keep, so I will make a corresponding access for my GitHub site for us to use as well. We don't have to use that one. You can create your own, or we can do something else. I'm just trying to make a placeholder until we can agree on what works for the team so that we don't lose track of things in the mean time.

Learning how to use this, but this is the project description document I emailed out with some minor changes. My track changes should have been turned on, and I added a comment as well.

Here is the revised version of the project description based on Rashad's feedback.

root — 16 Sep 2015, 16:06

From sgj0001 ,

I apologize for being a little late to the party. I think project description looks like it is in a good spot.

root — 16 Sep 2015, 16:07

Here is the presentation that was included with the submitted project description.

root — 16 Sep 2015, 21:43

Summary of Review:

Author: Corey Sanders

Reviewers: Rashad Madyun, Stephen Jalbert

Moderators: Rashad Madyun, Stephen Jalbert

Outcome: Accepted

Date: 9/12/15

Notes:

DEFECT: Reword text describing how sensor data is used by the system to determine train position.

DEFECT: Minor grammar corrections throughout
